Total points 100/100 ?

Assignment on DNS and Email Protocols

The respondent's email (**md.rimon.hossain2@g.bracu.ac.bd**) was recorded on submission of this form.

Student ID *

23201644

✓ Which of the following is a protocol used by e-mail servers to store messages and synchronize the message across multiple devices?

*5/5

☐ POP3

☒ IMAP

☐ HTTP

☐ STP

✓ Which protocol is a PUSH protocol? *

5/5

☐ POP3

☒ SMTP

☐ TCP

☐ IMAP

✓ Which email protocol is better when I have many emails and use only with one device ? *5/5

☒ POP3

☐ SMTP

☐ TCP

☐ IMAP

✓ If a server has no clue about where to find the IP address for a hostname then *5/5

☐ server asks to its adjacent server

☐ request is not processed

☒ server asks to the root server

☐ none of the mentioned

✓ DNS database contains the following * 5/5

☐ name server records

☐ mail server records

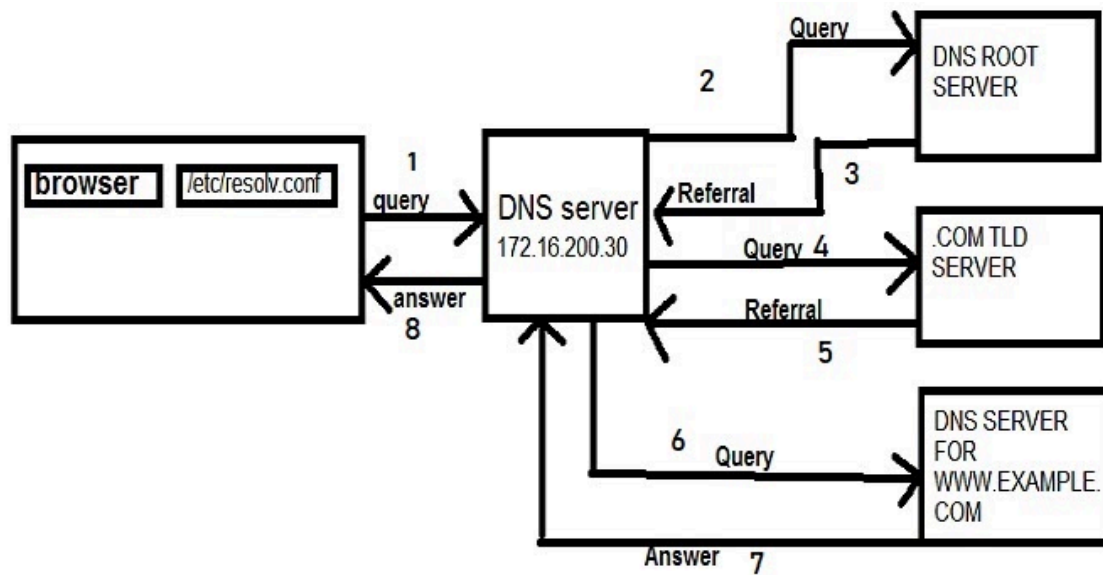

☐ hostname aliases

☒ all of the mentioned

✓ Which DNS method does the figure below follow? *

5/5

- ☐ Comprehensive
- ☐ Recursive
- ☐ Selective
- ☒ Iterative

✓

✓ Recursive Query is not recommended because *

5/5

- ☐ It makes too many queries
- ☐ The Local DNS server is burdened with the queries it requires to make
- ☐ The query packets get lost
- ☒ The Root server is burdened with the queries it requires to make

✓

✓ The following DNS record *
[example.com, NS1.example.com, NS, 1800]
represents

5/5

- ☐ The email server name
- ☐ The local web server name
- ☒ The authoritative DNS server name
- ☐ The FTP server name

✓ What the TLD servers keep track of? *

10/10

- ☐ Individual user email addresses
- ☐ The complete contents of websites
- ☒ The authoritative name servers for second-level domains
- ☐ The physical locations of Internet users

✓ Your Local DNS server does have the addresses of all the Root servers and the TLD server of .com and .org. Your PC sends a request for www.bestschool.edu. Where will your PC's DNS resolver send the first query? *5/5

- ☐ Send it to a TLD server
- ☒ Send it to local DNS server
- ☐ Send it to the .org TLD server
- ☐ Send it to a ROOT server
- ☐ Option 5

✓ What is the primary role of SMTP in the email transmission process? 5/5

- ☐ To retrieve emails from the server
- ☒ To send email messages from one server to another
- ☐ To encrypt email messages
- ☐ To store email messages on the server

✓ What is the function of POP in the context of email? 5/5

- ☒ Transfers email messages from the server to the client.
- ☐ Transfers email messages from one server to another.
- ☐ Encrypts email messages for secure transfer.
- ☐ Stores email messages in a web-based interface.

✓ IMAP differs from POP in that IMAP

10/10

- ☐ Allows offline access to emails.
- ☐ Only allows downloading of email messages.
- ☒ Provides more features, including manipulation of stored messages on the server. ✓
- ☐ Does not allow emails to be stored on local devices.

✓ What does SMTP use to ensure that messages are delivered reliably?

10/10

- ☐ HTTP protocols
- ☐ UDP connections
- ☒ TCP connections ✓
- ☐ Some encryption

✓ In an SMTP interaction, what is the significance of the command 'HELO'?

5/5

- ☐ It starts the email retrieval process.
- ☒ It begins the SMTP session between two devices ✓
- ☐ It ends the SMTP session.
- ☐ It signals the transfer of message body.

✓ What advantage does IMAP have over POP3 when managing email messages? 10/10

- ☐ IMAP requires less server space.
- ☒ IMAP allows users to view and organize their email directly on the server. ✓
- ☐ POP3 offers better security features than IMAP.
- ☐ POP3 supports both online and offline email processing.
